

STAYPUT

TYPICAL APPLICATIONS

Stayput Coolant hoses are generally used for conveying suds oil for coolant purposes on lathes, millers, wet grinders...etc

This tube is also used for stayput supports on reading lamps, microphones, video cameras and various other equipment, that requires a positionable support.

Our special services should enable us to meet your requirements for non standard stayput tubes.

PROPERTIES

This tube is made with an Inner Spring that has a Mild Steel Outer plated in a bright zinc coating. They can be supplied with or without fittings attached either end to a maximum of 1meter long.

If required this tube can be supplied with different fittings and in lengths to suit your application
